## 2

### Klik pada Bukti up

#### Enable or reset multi-factor authentication (MFA)

To log-in to Ericsson's tools, a customer, partner or other external party is offered a two-step verification process. The multi-step approach uses something a visitor knows (like password) together with something they have (like an app in their phone), to confirm access and credentials.

##### Enable MFA for the first time

To enable MFA for the first time, please go to Microsoft's proof up page by clicking on the "Proof up" button below.

[Proof up](#)

If you need to reset your MFA setup, please use the field below. When the reset request has been approved, proof up again through the button above.

##### Reset your current MFA setup

To reset your current MFA setup, press the "Reset current MFA" button below. This will send an email to your responsible person who needs to approve the request. You will get notified of who your responsible person is when the request has been sent.

[MFA is not enabled yet for your account.](#)

##### Your pending requests

You do not have any pending requests
